PAWTNER IN CRIME

Litter Routine Tracker

Cat's name: _____ **Number of trays:** _____ **Litter we use:** _____

This Week: Tick Each Job Done

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Morning scoop At least twice a day	☐	☐	☐	☐	☐	☐	☐
Evening scoop	☐	☐	☐	☐	☐	☐	☐
Litter topped up About 3 cm (1 in) deep	☐	☐	☐	☐	☐	☐	☐
Mat shaken out Or wiped clean	☐	☐	☐	☐	☐	☐	☐

Tray Washes: Write the Date

	Tray 1	Tray 2	Tray 3	Mat	Notes
Last full wash					
Next wash due 2-4 weeks (clumping), weekly (non-clumping)					

Changes I Noticed

Questions for the Vet

Ask your vet first. If your cat suddenly stops using the tray, strains, or goes often in small amounts, see your vet. A male cat that cannot pass urine needs immediate veterinary care.

Good to know

- Wash trays with hot water and a biological detergent. Avoid strongly scented products and some disinfectants, which can be toxic to cats. Rinse and dry well.
- Keep trays in a quiet spot away from food, water and busy areas.

A free printable from the Blog. Based on guidance from International Cat Care and the ASPCA; ask your vet about your cat.
